SINERGY WHITE

BLEND OF ELLAGIC TANNINS AND INACTIVE YEAST RICH IN GLUTATHIONE

CHARACTERISTICS

It is a preparation designed for white and rosé wines, in order to promote and improve their aromatic intensity and prevent the formation of dark or orange notes. It is the result of experiences developed in the cellar, to prevent the must spilled from the grapes from being rapidly altered by environmental oxygen, especially in the presence of residual metal catalysts of the treatments in the vineyard. SYNERGY WHITE exploits the synergistic action of yeast derivatives rich in glutathione and a pool of tannins particularly active in blocking the free radicals generated by copper. It forms a protective barrier that safeguards the aromas and promotes the natural evolution of the catechins.

APPLICATIONS

During the mashing and crushing phases to quickly complex oxidized derivatives and competitively inhibit the action of polyphenol oxidase***.***

In oxygenations in the aqueous phase to prevent the formation of free radicals, which would act as strong oxidants.

In the oxygenation in alcohol phase to favor the stabilization of the catechins, avoiding that their permanence in native-unstable form alters the chromatic notes of the future wine.

SINERGY WHITE can also be used to reduce the use of sulfur dioxide especially before alcoholic fermentation.

DOSES AND MODE OF USE

In hopper, on crushed and in aqueous phase: 20-40 g / q
In alcohol and decanting phase: 10-20 g / hl.

Disperse directly on the grapes in the hopper. In the pressing and in the wine dissolve in a volume of water equal to 10 times the weight used and incorporate in the mass, favoring its dispersion.

COMPOSITION

Selected ellagic tannins associated with inactive yeast naturally rich in glutathione.

PACKAGING

Bags of *10 kg*

Stored in cool and dry places. It is recommended to use quickly after opening the package.

This is a product not considered dangerous therefore does not require MSDS

Azienda con Sistema di Gestione della Qualità certificato ISO 9001:2008 - certificato N. IT06/0451
